List of Tracks:

- Apify
- Gemini
- Convex
- GoDaddy
- People-First Social Impact
- Figma Best Design

Apify

- Marketplace of ready-made web scraping and automation tools,
    - pull recipes from websites without apis
    - pull expiration data on niche products

Gemini

- use gemini for vision, scanning and parsing receipts
- normalizing messy receipt text and categorizing items
- Estimating expiration dates per item using **Apify's shelf life data**
- generate recipe suggestions
- Keeps split clean: apify gets data, gemini interprets it.

Convex

- DB, with real file storage for receipt photos, and actions for calling LLMs and Apify.

GoDaddy

- Just use to register a domain for the project. easy.

People-First Social Impact

- Projects that directly improve peoples lives, usually in areas like health, edu, accessibility. Works perfectly with this project

Best Planet-First Hack

Figma Best Design

- Straightforward
- We want a mascot
